About WAND Foundation Taxonomies

WAND is the industry leader in developing and providing pre-built foundation taxonomies to companies around the world to improve organization, tagging, and search of unstructured and semi-structured information. Applications for WAND Taxonomies are wide ranging and include tagging in enterprise content management (including SharePoint 2010, SharePoint Online, Oracle Webcenter, MarkLogic, Documentum, ASG, SAS, Drupal, Wordpress, and more), e-commerce catalogs, business categorization, directory search, spend analysis, behavioral targeting, enhancing search, and more.

The WAND Taxonomies in this catalog are foundation taxonomies, meaning they are designed to provide a strong starting point which can then be customized for a specific business's needs. It's difficult to find a taxonomy that will be a perfect fit for your needs straight out of the box, so foundation taxonomies are a great place to start because they can provide an initial 80% starting point and jump-start. With foundation taxonomies, the time spent developing taxonomy is dramatically reduced. Foundation taxonomies provide a common sense starting point for all stakeholders in a taxonomy project so that targeted feedback can be provided to customize the taxonomy specifically for your needs. When companies start with a blank slate when embarking on a taxonomy project, the results are usually not very successful.

WAND has professional services and related tools to help customize these foundation taxonomies. Tools and services include taxonomy roadmap development, taxonomy customization, automatic tagging, business categorization, URL classification, spend analysis, query log analysis, product classification, taxonomy integration consulting, and more.

With over two decades of experience in developing and deploying taxonomies, WAND has the expertise to help make any taxonomy driven project a success.

WAND Product and Service Taxonomy

The WAND Product and Service Taxonomy has been developed over the course of 20 years and includes 43,000 categories covering all products and services. Organized into a multi-level hierarchy, the WAND Product and Service Taxonomy includes more than 42,000 synonyms, translations into 11 languages (Spanish, French, Italian, Portuguese, German, Swedish, Japanese, Traditional Chinese, Simplified Chinese, Korean, Vietnamese), and over a million additional keywords from electronic search environments. Unique attribute templates have been developed for each category making the WAND Product and Service Taxonomy ideal for cataloging and product classification.

The WAND Product and Service Taxonomy is organized into 33 top level packages (some of which are listed separately in this catalog). Components of this taxonomy are also used in WAND's vertical industry taxonomies, for example in the Oil and Gas Taxonomy.

Mappings to numerous other business or industry classification schemas including UNSPSC, NAICS, SIC-4, SIC-6, HS, multiple yellow pages headings, and more have already been developed and custom mappings to any other classification schemas can be developed.

The WAND Product and Service Taxonomy can be used for business classification, directory categories, spend analysis, query categorization, keyword generation, website classification, document tagging, and much more.

WAND General Business Taxonomy

This taxonomy is a starter set of terminology for any business covering five major functional areas that are common to every company: IT, Legal, HR, Accounting and Finance, and Sales and Marketing. Since being made available in March, more than 2,500 companies from around the world have downloaded this taxonomy.

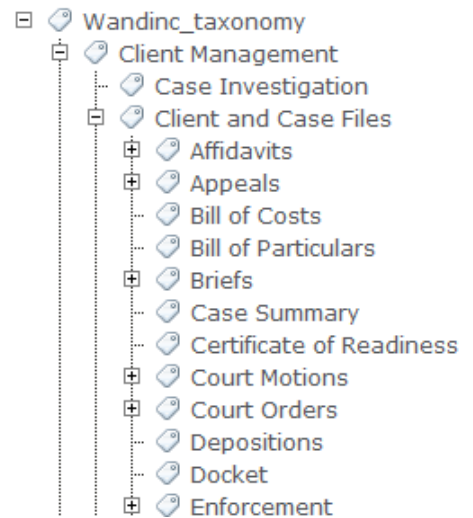

The General Business Taxonomy, with nearly 500 terms, is an easy way for companies to begin to experiment with the managed metadata services and term store in SharePoint 2010. For many companies, the General Business Taxonomy is a terrific starting point for beginning to create their own term sets.

- Accounting and Finance
- Human Resources
 - Annual Employee Reviews
 - Benefits Insurance Plans
 - Compensation Plans
 - Employee Assistance Programs
 - Foreign Workers
 - Legal Compliance
 - Payroll Processing

- Marketing

WAND Legal Taxonomy

The Legal Taxonomy includes 745 terms, with 136 synonyms, designed to help a law firm, or a legal department within a company, organize legal documents and concepts including case matters, area of law, legal document types, and more.

If you are a law firm or a legal department that is looking at creating enterprise taxonomy, this taxonomy can dramatically speed up your time to deployment.

WAND Manufacturing Taxonomy

The WAND Manufacturing Taxonomy has over 450 terms and covers manufacturing processes, quality control, manufacturing sales, manufacturing accounting, engineering and design, planning, and more.

This taxonomy is designed to suit the document management needs of any manufacturing company. This taxonomy can be supplemented with materials taxonomies and product taxonomies from the WAND Products and Services Taxonomy to cover the specific physical goods that are being manufactured.

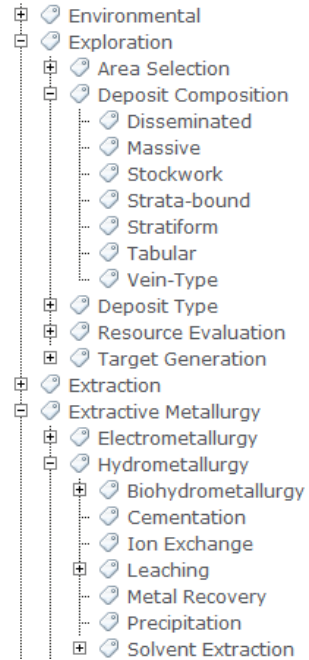

The Manufacturing Taxonomy can be combined with the [WAND IT Department Taxonomy](#) to make a complete product development taxonomy

- ⊖ Engineering and Design
- ⊖ Manufacturing Accounting
- ⊖ Manufacturing Planning
 - ⊖ Capacity Planning
 - ⊖ Computer-aided Planning Process

 - ⊖ Product Distribution

WAND Mining Taxonomy

The WAND Mining Taxonomy has 900+ terms and 200+ synonyms covering most major mining business areas including exploration, extraction, extractive metallurgy, geology, equipment, safety, and more.

Designed for mining companies of all types, this taxonomy can give a mining company's document management and taxonomy project a big jump start.

WAND Project Management Taxonomy

The WAND Project Management Taxonomy contains 135 categories with 63 synonyms covering project initiation, planning and design, execution and construction, monitoring and control, and completion.

These terms include all of the important documents that are created in the course of managing a project. By tagging documents with this project management vocabulary as they are checked into a document management system, they can easily be found later.

Customize this taxonomy with a set of a company's specific project names, and multiple sets of project management documents can be tagged and easily be navigated by document type and project name.

- ☞ Completion
- ☞ Execution and Construction
- ☞ Initiation

 - ☞ Human Resources Plan
 - ☞ Materials Requirements Plan
 - ☞ Organizational Change Plan
 - ☞ Process Improvement Plan
 - ☞ Procurement Management Plan
 - ☞ Project Control Tracking Chart

WAND Real Estate Taxonomy

With 733 terms and 169 synonyms, the WAND Real Estate Taxonomy covers the three main pillars of any real estate company: real estate development, real estate investment, and real estate management, as well as financing and analysis.

This real estate taxonomy was designed specifically for a real estate centric organization who is undertaking a document management or search initiative. It covers the important concepts and document types that a real estate organization may want to use to tag and search for documents.

The WAND Real Estate Taxonomy should also be considered by any organization which may have significant real estate holdings as a natural by-product of its core business.

WAND Information Technology Taxonomy

WAND's Information Technology Taxonomy has over 1,700 categories designed specifically to help an IT department tag, organize, and search all of its content.

WAND's Information Technology Taxonomy includes terminology covering commercial software packages, programming languages, IT certifications, IT administration processes, IT equipment, and much more.

The WAND IT Taxonomy can be combined with the WAND Manufacturing Taxonomy to become a product development taxonomy.

- [-] Information Technology
 - [-] Commercial Software Packages
 - [-] Development Concepts
 - [-] APIs
 - [-] Application Frameworks
 - [-] Data Exchange Protocols
 - [-] Development Techniques

 - 🔍 Cutting Rings (Food Service)
 - 🔍 Distillation Equipment
 - 🔍 Egg Processing Equipment
 - 🔍 Fish Processing Equipment

WAND Sensory Taxonomy

The WAND Sensory Taxonomy covers 339 categories and 42 synonyms covering descriptors of the five major senses: taste, smell, touch, sound, and sight.

The WAND Sensory Taxonomy was designed specifically to help tag and organize documents related to food and beverage product development research and testing.

This is an ideal taxonomy to pair with the WAND Foods and Beverages Taxonomy.

WAND Automotive Parts and Equipment Taxonomy

The WAND Automotive Parts and Equipment Taxonomy comprises 1,782 terms covering all automotive parts and supplies. Individual parts are organized in the hierarchy based upon their corresponding automotive system. Fuel systems, brake systems, car bodies, control systems, and much more are used to organize the specific terms.

This taxonomy is ideal for an automotive manufacturing company or any business involved in auto parts or repair.

The WAND Automotive Parts and Equipment Taxonomy was built as part of the WAND Product and Service Taxonomy and includes rich attribute templates for each product category making it powerful when used for product or inventory cataloging

- ⊞ Automotive Accessories
- ⊞ Automotive Parts
 - ⊞ Aero Parts (Automotive)
 - ⊞ Automotive Air Conditioning and Heating Systems

 - Bath Pillows
 - Bath Salts
 - Bath Tablets

WAND Medical Equipment and Supplies Taxonomy

With 1,066 terms, the WAND Medical Equipment and Supplies Taxonomy has deep coverage of equipment and supplies used in hospitals, doctor’s offices, or other medical environments.

The WAND Medical Equipment and Supplies Taxonomy can be combined with the WAND Medical Diagnosis and Specialties Taxonomy and the WAND Medical Services Taxonomy for greater coverage of medical topics.

The Medical Equipment and Supplies Taxonomy was built as part of the WAND Product and Service Taxonomy and includes rich attribute templates for each category, making it powerful when used for product or inventory cataloging purposes.

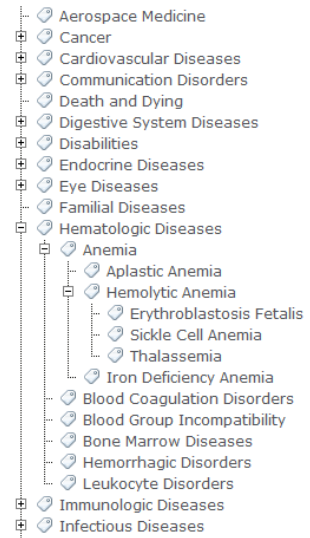

- Medical Equipment
 - Adaptive Technology Equipment
 - Alternative Medicine Equipment and Supplies
 - Anesthesia Equipment
 - Audiological Equipment
 - Chiropractic Equipment and Supplies
 - Dental Equipment and Supplies
 - Diabetic Equipment and Supplies
 - Electromedical Equipment
 - Electrosurgical Equipment and Instruments
 - Emergency Medical Equipment
 - Enteral Feeding Equipment

 - Collodion
 - Cotton Swabs
 - Dialysis Tubing

WAND Medical Conditions and Specialties Taxonomy

The WAND Medical Conditions and Specialties Taxonomy covers medical conditions, such as cancer, anemia, disabilities as well as medical specialties such as oncology, cardiology, and more.

Organized into a simple and straightforward hierarchy, this taxonomy is ideal for a hospital or other medical business that wants to help make medical information easy to find for doctors, patients, and other stakeholders.

The WAND Medical Conditions and Specialties Taxonomy would be great as a starter taxonomy for a hospital website.

WAND Building and Construction Management Taxonomy

The WAND Building and Construction Management Taxonomy has 3,200+ terms and 700+ synonyms of concepts, equipment, processes, and document type that are important for any building and construction project.

This is an ideal taxonomy for any construction business that wants to tag and organize project documents more effectively.

The WAND Building and Construction Management Taxonomy includes a rich set of materials, equipment, and supplies from the WAND Product and Service Taxonomy.

- ☞ Building and Construction Agreements
- ☞ Building and Construction Equipment and Supplies
